Cal OES COASTAL REGION

Roadway Damage due to Winter Storms, Humboldt County

On 12/19/16 at 1712 hours the California State Warning Center (CSWC) received a Proclamation from Humboldt County declaring a local emergency due to damage to roadways caused by recent storms and flooding. There are approximately 6 roads in the area that have either sustained damage or are in danger of sustaining damage due to landslides caused by recent winter storms to include California Disaster Assistance Act (CDAA).

- Humboldt County has requested all available recovery assistance from the State and Federal Government.
- The Cal OES Fire Duty Officer (FDO) and Cal OES Coastal Region Duty Officer (CDO) are in contact with Humboldt County and providing updates as they become available.
- On 12/21/16, Board of Supervisors (BOS) Minute Orders and a CDAA Request Letter was received for the Proclamation from Humboldt County for storm damages.

Proclamations

- On 12/21/16 a Resolution was received for Del Norte County due to storm and flooding related events, the county is requesting all available State and Federal Assistance.

Cal OES INLAND REGION

- Nothing Significant to Report.

Cal OES SOUTHERN REGION

- Nothing Significant to Report.

SITUATION SUMMARY

California Department of Public Health Zika Virus and Meningococcal Disease Update

The Medical and Health Coordination Center (MHCC) continues to be activated in response to the Zika virus disease. The California Department of Public Health (CDPH) and Emergency Medical Services Authority (EMSA) are currently the only Emergency Function 08 (EF 08) partners at the state level reporting on this activation.

- The MHCC is coordinating with EF 08 partners, healthcare facilities and local health departments (LHDs) to ensure responses are timely and accurate.
- CDPH and EMSA Duty Officer Programs are monitoring the Zika virus disease outbreak after hours and remain in communication with the Regional Disaster Medical and Health Coordination (RDMHC) and the Medical Health Operational Area Coordinator (MHOAC) Programs throughout California.
- As of Friday, 12/16/16, there have been 440 travel-associated Zika virus infections in California. This number reflects an increase of 7 from the 433 cases reported in the last operational period. CDPH centers and programs continue to monitor Zika virus disease and provide information to the MHCC related to their specific activities on a weekly basis.
- Please see attached for full report.

Remote/Community Isolations:

- None reported.

WEATHER OF CONCERN

Weather of Concern

- Dry conditions this morning and afternoon will give way to increasing clouds and chances for rain tonight as the next frontal system moves into Northern California. A few inches of snow are possible into the foothills late Friday night into Saturday. Gusty winds are also expected for portions of Northern California, but rainfall is expected to be less than with recent rainstorms.
- Two storm systems will affect Southwestern California from this evening through Saturday impacting holiday travel. The first storm is already occurring. An area of low pressure will continue to funnel up plenty of subtropical moisture overnight. Rainfall totals from a tenth of an inch up to a half inch can be expected across portions of Southern California with locally up to an inch in the eastern San Gabriels and foothills.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

Key Points

12/22 – 12/28

Thursday

- Slight threat for minor flooding near the southern CA/Mexico border

Friday-Saturday

- Due to the busy holiday travel period and winter weather, travel hazards statewide will be possible, with slick roads and gusty winds later Friday into Saturday (especially in higher elevations). This is a cold storm, and snow is likely in valley locations by early Saturday.
- Moderate to heavy snow is expected to significantly impact holiday travel over mountain passes (especially in the Sierra), with periods of whiteout conditions.
- Strong winds in mountain and desert locations statewide, will lead to blowing snow, low visibility, and possible downed trees and power outages
- There is a slight chance for urban flooding and possible mud/debris flows in recent burn scar areas in southern CA

Monday-Tuesday

- Slight chance for another storm system to impact the state early next week. If this materializes, there could be winter travel hazards for folks returning home from the holiday weekend.

	High Threat
	Moderate Threat
	Slight Threat
	No Discernible Threat

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

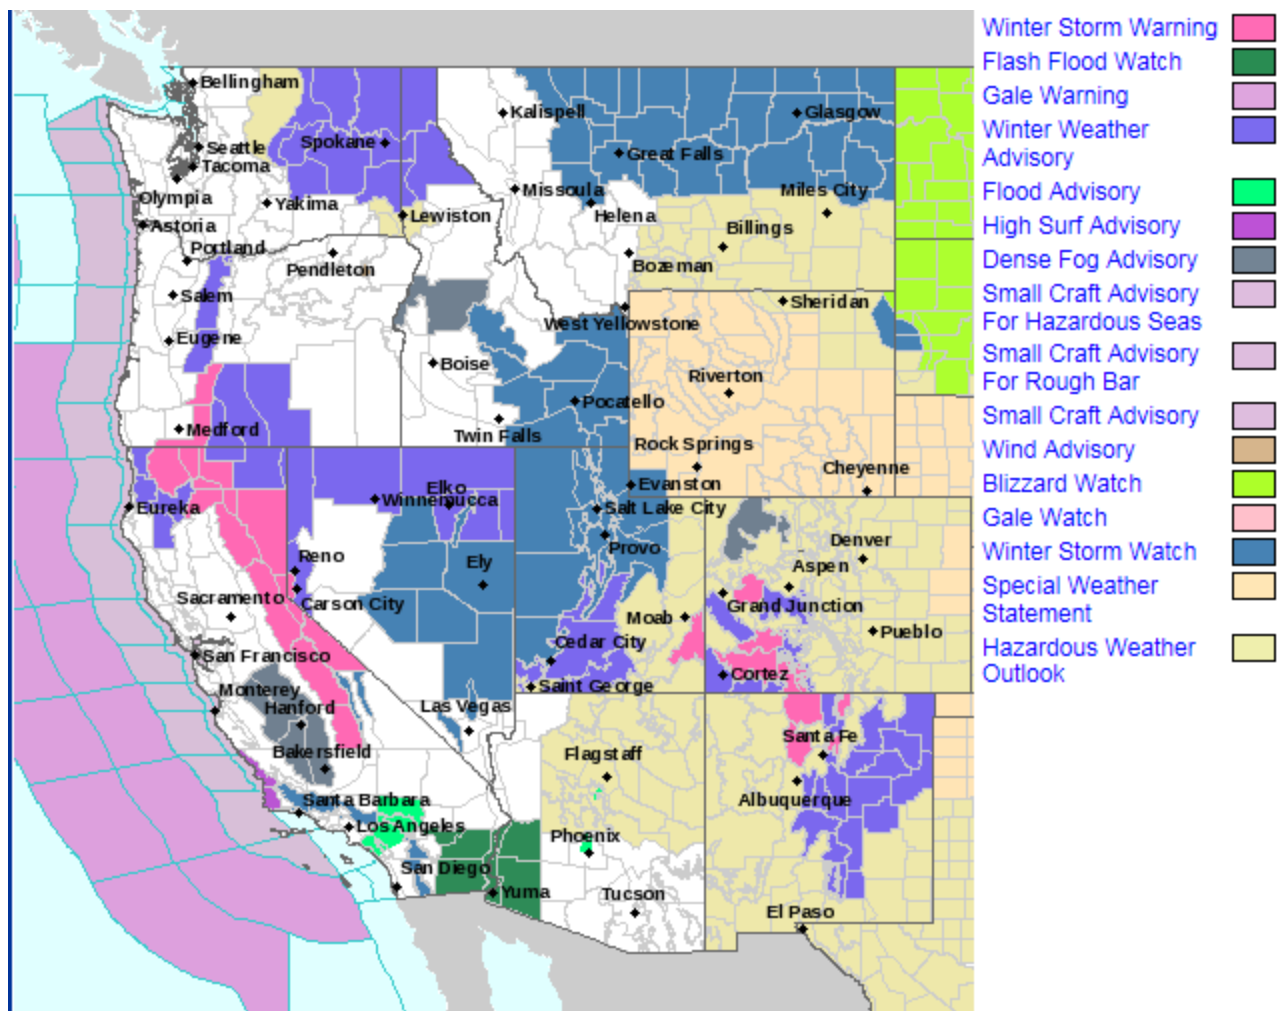

Today will be another dry and mild day across the region. However, the next Pacific frontal system will reach the north coast late this evening. As the system approaches clouds and southerly winds will increase. Moderate to brief heavy precipitation will spread over western areas tonight, reaching the Bay Area and northern end of the Sacramento Valley by early Friday and all eastern areas by noon. The main front will be at the tail end of the main band of precipitation. Showers will continue behind the front, with more coverage over the higher terrain. Wind-prone areas will see southerly gusts reach 30-40 mph along and ahead of the cold front on Friday. Snow levels will start out between 4000-5000 feet, but fall to 2000-3500 feet once the front passes. The last showers will end in the eastern mountains midday Saturday. On Christmas Day a weak Pacific low pressure system will move toward Central California. It will spread light rain showers into the western and southern portions of the region late in the afternoon. Other areas will remain partly cloudy, cool, and dry.

SOUTHERN CALIFORNIA

An area of low pressure moving inland over Northern Baja will bring showers to Southern California through this afternoon. Most locations over Southern California will receive an additional quarter inch to an inch of rainfall. A storm from the Gulf of Alaska will bring showers to the northern portions of Central California Friday morning. The showers from this storm will reach Southern California by Friday evening. Some light showers will be possible across Southern California in between systems. Showers from the Gulf of Alaska storm will continue across the region through Saturday evening. Most foothill and mountain locations will receive between 2 and 4 inches of rainfall and most coastal and valley locations will receive between 1 and 2 inches of rainfall Friday and Saturday. The snow level will drop to around 3,000 feet by Saturday morning. Southerly winds of 20 to 40 mph with gusts to 60 mph will surface across the wind prone mountain and desert areas Friday afternoon and Friday evening and then become westerly with the same speeds Saturday. Temperatures will be near normal through Friday, with upper 30s and 40s across the mountains and mid 50s to mid 60s in the valleys. Temperatures will become well below normal Saturday, with mid 20s to mid 30s across the mountains and 40s to low 50s in the valleys. A weak ridge of high pressure will bring a little warmer temperatures Sunday, but temperatures will remain quite a bit below normal.
